<b>Total value of the fund</b>	\$36,621
<b>The date the fund started</b>	16 August 2023

### What are the risks of investing?

Risk indicator<sup>1</sup> for Tempo Australasian Property Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz/tools/investor-profiler/](https://sorted.org.nz/tools/investor-profiler/).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five year period to 31 December 2023. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

## How has the fund performed?<sup>2</sup>

	PAST YEAR
Annual return (after deductions for charges and tax)	Not applicable
Annual return (after deductions for charges but before tax)	Not applicable
Market index annual return (reflects no deduction for charges and tax)	6.33%

The market index return is based on the S&P/NZX All Real Estate Gross with Imputation Index.

Additional information about the market index is available on the Tempo Funds' entry on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

## What fees are investors charged?

Investors in the Tempo Australasian Property Fund are charged fund charges. Based on the PDS as at 7th August 2023 these charges are:<sup>3</sup>

	% OF NET ASSET VALUE <sup>4</sup>
<b>Total fund charges</b>	1.20%
<b>Which are made up of:</b>	
<b>Total management and administration charges</b>	1.20%
<b>Including</b>	
Manager's basic fee <sup>5</sup>	1.20%
Other management and administration charges	0.00%
<b>Total performance-based fees</b>	0.00%
<b>Other Charges</b>	<b>Dollar amount per investor</b>
	\$0.00

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds), although no such fees currently apply. See the PDS for more information about fees. Small differences in fees and charges can have a big impact on your investment over the long term.

### Example of how this applies to an investor<sup>6</sup>

Phoebe had \$10,000 in the fund since its inception on 16th August 2023 and did not make any further contributions. At the end of December 2023, Phoebe received a return after fund charges were deducted of \$23 (that is 0.23% of their initial \$10,000). This gives Phoebe a total return after tax of \$28 for the period.

## Notes

1. This fund was launched on 16th August 2023. We've calculated the risk indicator using market index returns data for periods before that date, and actual fund returns data afterwards. Using market index returns means that the risk indicators may provide a less reliable indicator of the potential future volatility of the funds. If a fund mainly invests into another fund with a higher risk indicator, we use that higher number.
2. Because the fund has not been in existence for a full year as at the relevant date, we have not included annual return figures. We have however included market index returns.
3. The fund was launched less than 12 months ago, so these are the fund charges that will be charged, rather than the fund charges that were charged in the most recent scheme year.
4. These charges are inclusive of GST.
5. The manager's basic fee is made up of a flat Tempo fee of 0.85% plus an underlying fund fee of 0.35%. We are also the manager of the underlying fund.
6. Please note that because the fund has not been in existence for a full year as at the relevant date, this example and the returns shown are for the period since inception, not annual figures.
