

Tempo Funds

Tempo Tech Fund

Fund update for quarter ending 31 March 2024

This fund update was first made publicly available on 1st May 2024. It is a replacement fund update for the update made publicly available on 30th April 2024. In this replacement fund update, the risk indicator has been updated for the correct risk indicator, which was previously incorrect.

What is the purpose of this update?

This document tells you how the Tempo Tech Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Forsyth Barr Investment Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Tempo Tech Fund invests in an international passively managed exchange traded fund that invests in North American companies in the technology sector, and other selected North American companies within the communication services and consumer discretionary sectors, aiming to track a market index and provide investment returns in line with the index.

Total value of the fund	\$112,288
The date the fund started	16 August 2023

What are the risks of investing?

Risk indicator¹ for Tempo Tech Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler/.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five year period to 31 March 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?²

	PAST YEAR
Annual return (after deductions for charges and tax)	Not applicable
Annual return (after deductions for charges but before tax)	Not applicable
Market index annual return (reflects no deduction for charges and tax)	60.36%

The market index return is based on the S&P North American Expanded Technology Sector Index (USD) Total Return Index unhedged to the New Zealand dollar.

Additional information about the market index is available on the Tempo Funds' entry on the offer register at www.disclose-register.companiesoffice.govt.nz.

What fees are investors charged?

Investors in the Tempo Tech Fund are charged fund charges. Based on the PDS as at 7th August 2023 these charges are:³

	% OF NET ASSET VALUE ⁴
Total fund charges	1.26%
Which are made up of:	
Total management and administration charges	1.26%
Including	
Manager's basic fee	0.85%
Other management and administration charges (estimated) ⁵	0.41%
Total performance-based fees	0.00%
Other Charges	Dollar amount per investor
	\$0.00

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds), although no such fees currently apply. See the PDS for more information about fees. Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor⁶

Phoebe had \$10,000 in the fund since its inception on 16th August 2023 and did not make any further contributions. At the end of March 2024, Phoebe received a return after fund charges were deducted of \$3,215 (that is 32.15% of their initial \$10,000). This gives Phoebe a total return after tax of \$3,132 for the period.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Target investment mix

ASSET CLASS	ASSET CLASS TARGET ASSET MIX
Cash and cash equivalents	0.00%
New Zealand fixed interest	0.00%
International fixed interest	0.00%
Australasian equities	0.00%
International equities	100.00%

Further information

You can also obtain this information from the PDS for the Tempo Funds, and some additional information from the offer register at www.disclose-register.companiesoffice.govt.nz.

Notes

1. This fund was launched on 16th August 2023. We've calculated the risk indicator using market index returns data for periods before that date, and actual fund returns data afterwards. Using market index returns means that the risk indicators may provide a less reliable indicator of the potential future volatility of the funds. If a fund mainly invests into another fund with a higher risk indicator, we use that higher number.
2. Because the fund has not been in existence for a full year as at the relevant date, we have not included annual return figures. We have however included market index returns.
3. The fund was launched less than 12 months ago, so these are the fund charges that will be charged, rather than the fund charges that were charged in the most recent scheme year.
4. These charges are inclusive of GST.
5. These charges include the management fees of underlying funds where we are not the manager. In order to estimate these charges, we take into account the proportion of the Tempo Fund that is invested in the underlying fund. We also consider the public disclosures for the underlying fund about its management and administration charges. We have assumed that these will not change. We review all these estimates on an annual basis.
6. Please note that because the fund has not been in existence for a full year as at the relevant date, this example and the returns shown are for the period since inception, not annual figures.
